Galapagos Luxury Cruise Ship

08 D - 07 N Saturday Departure

Santa Cruz - Isabela - Fernandina - Santiago

Day 01: Baltra Island

Arrival and transfer to the boat. Briefing onboard about the boat and the island.

Charles Darwin Research Station

The CDRS is an international not-for-profit organization that provides scientific research, technical information and assistance to ensure the proper preservation of the Galápagos Islands. Visitors can learn about natural history, issues concerning the islands, and see the tortoise breeding and rearing project at work.

Highlights: Vegetation

Animals: Galápagos flycatchers, small tree-finches, woodpecker finches

Difficulty: Easy

Landing: Dry

*Note that the listed activities may differ depending of the time of the day of your visit, cruise itinerary and National Park regulations.

Meals Included: Breakfast- Lunch & Dinner

Day 02: Santa Cruz Island

Whale Bay

is the site of one of the oldest whaling camps on Santa Cruz Island. It was to here and the other similar camps that the giant tortoises were brought before being loaded onboard the whalers and pirate ships. The semicircle beach is green in color, due to a high volume of olivine crystals. The curious Galápagos hawk can also found here.

Dragon Hill

The Dragon Hill (Cerro Dragon) visitors' site was established by the Galápagos Islands National Park administration. A hypersalinic (saltier than the ocean) lagoon behind the beach is often frequented by flamingos, common stilts, pintail ducks and other species of birds. There is a short walk to the hill, which has rewarding views of the bay and a nesting site of land iguanas.

Highlights: Green beach

Animals: Galápagos hawks, Galápagos sea lions, marine iguanas, Darwin's finches, yellow warblers, frigate birds, blue-footed boobies

Difficulty: Difficult walking

Landing: Wet

***Note that the listed activities may differ depending of the time of the day of your visit, cruise itinerary and National Park regulations.**

Meals Included: Breakfast - Lunch - Dinner

Day 03: Isabela Island

Tintoreras

A short distance from Puerto Villamil is the small island known as Las Tintoreras. Here a colony of white tip sharks can often be seen resting in a lava canal. You can snorkel or swim in the unique habitat of these animals. On the nearby sandy beaches, sea lions play and relax in the sun. This is one of Isabela's most beautiful visitor sites.

The Wetlands of Isabela Island

are located just outside of Puerto Villamil. The Wetlands consist of lagoons, swamps and mangroves and are home to a variety of unique bird species such as common stilts, whimbrels, white-cheeked pintails and gallinules. The Wetlands can be visited on foot via a path that winds through the swamps.

Highlights: Snorkeling

Animals: Sea Lions, white-tip reef sharks, marine iguanas

Difficulty: Easy

Landing: Dry

Meals Included: Breakfast - Lunch - Dinner

Day 04: Isabela Island

Moreno Point

Here you can see beautiful rocky shores where penguins and shore birds, including great blue herons, are usually spotted. You can also enter a grove of mangroves, where oysters can be seen at the base of the trees. A trek traverses the sharpest lava rocks in the Islands where dry lava is interspersed with lagoons and small ponds containing abundant wildlife.

Urbina Bay

The waters of Urbina Bay are a good place to see turtles and rays and ashore is a short trail leading to a coral reef, which is evidence of an uplift from the sea which occurred in 1954. This provides the rare experience of walking in the middle of a bed of coral. Marine iguanas, flightless cormorants and pelicans can be seen at this site.

Highlights: Variety of landscape

Animals: Pintail ducks, flamingos, penguins, great blue herons, green sea turtles, lava lizards, Madeiran storm petrels, marine iguanas, mockingbirds

Difficulty: Difficult trek

Landing: Dry

*Note that the listed activities may differ depending of the time of the day of your visit, cruise itinerary and National Park regulations.

Meals Included: Breakfast - Lunch - Dinner

Day 05: Fernandina Island

Espinosa Point

Jr. E. Guzman Barron 3816Urb. Condevilla Señor SMP Phono: 0051 – 01 – 5693311

Punta Espinosa is a narrow stretch of land where hundreds of marine iguanas gather largely on black lava rocks. The famous flightless cormorant inhabits this island and Galápagos penguins, pelicans and sea lions are also abundant. Different types of lava flows can be compared and the mangrove forests can be observed.

Tagus Cove

Named after a British warship which anchored here in 1814, this cove is located to the west of the island and you can take a panga (zodiac) trip below the high cliffs. Here there is an opportunity to see penguins as well as marine iguanas, Sally Lightfoot crabs and sea lions. Blue-footed boobies are also in abundance.

Highlights: Galápagos snakes, marine iguanas, lava cactus, lava

Animals: Marine iguanas, flightless cormorants, Galápagos penguins, pelicans, sea lions, Galápagos snakes, great blue herons, green sea turtles, lava herons, lava lizards, Madeiran storm petrels, mockingbirds

Difficulty: Easy

Landing: Dry

*Note **that the listed activities may differ depending of the time of the day of your visit, cruise itinerary and National Park regulations.**

Meals Included: Breakfast - Lunch - Dinner

Day 06: Santiago Island

Puerto Egas, with its black sand beaches, was the site of small salt mining industry in the 1960s. A hike inland to the salt crater is an excellent opportunity to sight land birds such as finches, doves, and hawks. A walk down the rugged shoreline will turn up many marine species. Iguanas bask on the rocks and sea lions laze in the tide pools. At the end of the trail there is a series of grottoes or sea caves where fur seals and night herons are found.

Rábida Island

A bird-watcher's delight. Species includes Flycatchers, Galapagos Hawks and Brown Pelicans

Highlights: Salt crater; tide pools

Animals: Finches, doves, hawks, iguanas, fur seals, night herons

Difficulty: Steep but easy trail

Landing: Wet

***Note that the listed activities may differ depending of the time of the day of your visit, cruise itinerary and National Park regulations.**

Meals Included: Breakfast - Lunch - Dinner

Day 07: San Cruz Island

Bachas Beach

Here there are endemic species such as lava lizards and red-footed boobies. The view is impressive when you walk up to the high part of the island. You may be lucky to see the red footed booby, the least seen of the boobies. It is also the home of the Chatham mockingbird, only found on San Cristobal Island.

***Note that the listed activities may differ depending of the time of the day of your visit, cruise itinerary and National Park regulations.**

Meals Included: Breakfast - Lunch - Dinner

Day 08: San Cristobal Island

Interpretation Centre

The Galápagos National Park Interpretation Centre has a series of interactive exhibits providing information about the history and biodiversity of the Galápagos Islands. The self-guided walking tour will take you through the history of the Islands in the context of nature, humankind and conservation.

Highlights: Interactive exhibits

Animals: N/A

Difficulty: Easy

Landing: Dry
